

ADRIAN ROSIPAL

Vienna, Austria | +421 902 393 354 | adrian.rosipal98@gmail.com

Bilingual Front-End Developer (**React | TypeScript | RxJS | NgRx | Angular**) with extensive experience delivering large-scale, high-performance web platforms for global airline clients. Expert in modern frontend architecture, scalable UI design, accessibility compliance (WCAG), and robust testing strategies (unit & E2E). Strong focus on clean, maintainable code and driving engineering excellence through peer

CORE SKILLS

- **Frontend:** Angular (v17), React, TypeScript, RxJS, NgRx, HTML5, SCSS, JavaScript (ES6+), REST APIs
- **Testing:** Karma, Jasmine, Playwright, Unit & E2E testing, Storybook
- **Tools & DevOps:** Git, Azure DevOps, Agile (SAFe), Jira, Figma
- **Best Practices:** Accessibility (WCAG 2.1), Performance Optimization, Code Review, Modular Architecture

EXPERIENCE

03/2026 – Present

SOFTWARE DEVELOPER, Genetec – Vienna, Austria,

- Developing and maintaining real-time React applications for Alarm Management within Security Center SaaS
- Implementing scalable frontend features using React, TypeScript, SignalR, TanStack Query, and Preact
- Contributing to the migration of the Operation Center platform from Angular to a React-based microfrontend architecture
- Investigating and designing frontend architecture solutions around reactivity, caching, optimistic updates, invalidation strategies, and large-scale data handling
- Responsible for application architecture, technology evaluation, and key design decisions.
- Working on server-side approaches to improve performance and scalability
- Troubleshooting production issues, improving developer workflows, and contributing to technical direction and architectural discussions

07/2023 – 12/2025

FRONT END DEVELOPER, AMADEUS – Nice, France,

- Design and develop **Angular-based white-label booking and servicing platform** used by 80+ airlines.
- Implement new features across **booking, servicing, and email modules** using Angular v17, TypeScript, RxJS, and NgRx.
- Serve as a **mandatory Pull Request reviewer**, ensuring adherence to code quality and architectural standards across teams.
- **Increase test coverage by 20 %** through development of unit tests (Karma & Jasmine) and E2E tests (Playwright).
- Lead accessibility improvements to achieve **WCAG 2.1 compliance**, enabling full keyboard navigation and screen-reader support.
- Act as a **point of reference** for core components (e.g., email, carbon footprint), maintaining consistency and performance.
- Support onboarding of new developers through documentation, knowledge sharing, and technical mentoring.

IMPLEMENTATION ENGINEER, AMADEUS – Nice, France,

- Led a major **migration project** as Implementation Manager, overseeing transition of airline operations to new booking and servicing systems currently being used by **1M+ monthly users**.
- Served as **primary liaison** for two airline clients across Africa & Middle East, coordinating feature delivery and issue resolution.
- Provided **technical implementation support**, occasionally developing JavaScript-based customizations to meet client needs.
- Delivered solutions within tight deadlines while ensuring system stability and smooth go-live processes.

09/2022 – 03/2023

FRONT END DEVELOPER, ADAPTIVE CONSULTING SLU – BARCELONA

- Completed an intensive Early Careers Program, delivering a stock trading platform in an Agile environment.
- Contributed to an internal React component library used across multiple enterprise projects.
- Strengthened proficiency in React, TypeScript, CSS, and HTML, with best practices in Git version control.
- Collaborated with international teams (New York, London) to ensure timely delivery and cross-regional consistency.

EDUCATION

2021 - 2022

MSC SOFTWARE DEVELOPMENT, UNIVERSITY OF STRATHCLYDE

Key modules: Computer Security, Mobile Application Development, Database Development, Software Engineering, Object Oriented Programming

2017 - 2021

BACHELOR'S DEGREE – BA BUSINESS MANAGEMENT, GLASGOW CALEDONIAN UNIVERSITY
